Team	Sagunthala Devi.S – Solo Team
Maximum Marks	4 Marks

Empathy Map

Understanding the target user from four perspectives—what they Say, Think, Do and Feel—in relation to PocketSmart AI.

SAYS • I want recommendations that fit my budget. • I don't want to compare products and prices across many platforms. • I need suggestions based on my preferences and occasion.	PERSONA NAME Budget-Conscious Planner <i>(User Type)</i>	THINKS • Am I choosing the right product within my budget? • Can AI help me make a better decision? • I want personalized recommendations instead of random options.
DOES • Enters budget, preferences and requirements. • Compares products and services from different platforms. • Uses AI recommendations for home planning, parties and jewelry selection.		FEELS • Overwhelmed by the large number of products and price ranges. • Concerned about overspending. • Wants a simple, convenient and personalized planning experience.

Project context: PocketSmart AI provides personalized, budget-aware recommendations for home interiors, party planning and jewelry selection using AI.
